| GAWR—Front (pounds)                                     | 16,000  | 16,000  |
| GAWR— Tag Axle (pounds)                                 | —       | 10,000  |
| GAWR—Rear (pounds)                                      | 24,000  | 20,000  |
| GVWR (pounds)                                           | 40,000  | 46,000  |
| Maximum Trailer Weight (pounds) <sup>4</sup>            | 10,000  | 10,000  |
| Hitch Rating (pounds)                                   | 10,000  | 10,000  |
| GCWR (pounds)                                           | 50,000  | 56,000  |
| CAPACITIES                                              |         |         |
| Fuel Tank (gallons)                                     | 100     | 100     |
| DEF Tank (gallons) – PowerGlide® Chassis <sup>5</sup>   | 10      | 10      |
| DEF Tank (gallons) – Freightliner® Chassis <sup>5</sup> | 13      | 13      |
| Fresh Water (gallons)                                   | 100     | 100     |
| Grey Water (gallons)                                    | 100     | 100     |
| Black Water (gallons)                                   | 55      | 55      |
| QUANTITIES                                              |         |         |
| Number of Slideouts                                     | 4       | 4       |
| Sleeping Capacity <sup>7</sup>                          | 2 to 6  | 2 to 8  |
| Sleeping Areas <sup>7</sup>                             | 1 to 5  | 1 to 5  |
| Seat Belts <sup>7</sup>                                 | 4 to 8  | 4 to 10 |
| Seating Capacity <sup>7</sup>                           | 7 to 10 | 7 to 12 |

<sup>1</sup> The approximated coach width and length does not include side view mirrors and rear ladders.

<sup>2</sup> On tag axle coaches, measurement is taken from the center of the steer axle to the centerline between the drive and tag axle.

<sup>3</sup> Square footage was calculated with the slide-outs fully extended.

<sup>4</sup> Maximum trailer weight is dependent on the loading and towing variables which include the GVWR, GAWR, and GCWR, as well as adequate trailer brakes.

<sup>5</sup> Diesel Exhaust Fluid (DEF) is the active component used in Selective Catalytic Reduction (SCR) engines to reduce nitrogen oxide emissions by 90% to meet EPA standards.

<sup>6</sup> LPG tank can only be filled to 80% capacity.

<sup>7</sup> Dependent on furniture and dinette options.

| CHASSIS AND DRIVETRAIN                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                              |        |
